## Introduction to Health Policy Statements

| 0:01 | This short tutorial introduces you to the concept of writing health policy statements.  |
|------|---|
| 0:08 | Health policy statements respond to specific health problems by describing and          |
|      | analyzing potential policies designed to address these problems.                        |
| 0:17 | Policy statements can vary in length from single-page policy briefs to lengthy          |
|      | multipage policy white papers.  |
| 0:24 | Shorter statements will typically focus on outlining a single health policy in response |
|      | to a specific health problem.   |
| 0:31 | Longer statements, sometimes called "whitepapers," will outline several potential       |
|      | policies in response to a specific health problem.                                      |
| 0:38 | The more complex the health problem is, the more likely a longer policy statement       |
|      | will be required.   |
| 0:45 | Examples of health policy statements range from position papers on treatment            |
|      | protocols to comprehensive assessments of community health problems and                 |
|      | proposed solutions.   |
| 0:55 | The American Public Health Association publishes health policy statements annually,     |
|      | focusing on current public health topics.   |
| 1:03 | Those published in 2016 included improving health in low-income neighborhoods,          |
|      | improving health by increasing the minimum wage, and compulsory pasteurization of       |
|      | milk products intended for human consumption.   |
| 1:18 | Such policy statements may be directed at family practice providers, local, state, or   |
|      | federal policy makers, journalists, or even the general public.                         |
| 1:28 | The audience for the policy statement depends upon what you hope to achieve with        |
|      | the document.   |
| 1:33 | Who has the power to take action on a policy to address the health concern in           |
|      | question?   |
| 1:38 | Identifying a target audience for your policy statement is essential for the success of |
|      | your document.  |
| 1:45 | Based upon your understanding of the problem you plan to address and your               |
|      | understanding of what will be involved with solving the problem, you need to identify   |
|      | an audience who has the authority to enact the policy you describe.                     |
| 1:57 | Potential audiences may include community leaders, city councils, government            |
|      | agencies, non-government agencies, state legislators, or even federal legislators.      |
| 2:08 | In any case, you should know who your target audience will be and adjust your style,    |
|      | your choice of evidence, and your content depth to meet the needs of that target        |
|      | audience as you are writing.  |
| 2:22 | Policy statements are typically broken down into four content areas:                    |

| 2:26 | <b>Problem definition, which answers the question:</b> To what issue or problem does the policy statement respond? |
|------|--|
| 2:33 | Define the problem as specifically as possible, describing who it impacts and why your                             |
|      | audience should care.  |
| 2:39 | Your goal in this section is to clearly establish the significance of the problem and to                           |
|      | assert that a policy-based solution is needed.   |
| 2:48 | Policy Description, which answers the question: What specific policy action or                                     |
|      | actions will effectively address the problem?  |
| 2:56 | For a shorter statement, limit your focus to one specific policy approach.   |
| 3:01 | For longer documents, identify and describe multiple policy approaches.  |
| 3:06 | Again, the length of your statement will depend upon the complexity of the health                                  |
|      | problem and the audience you address.  |
| 3:14 | Evidence, which answers the question: What evidence do you have to support your                                    |
|      | description of both the significance of the problem and the efficacy of the policy or                              |
|      | policies you have described?   |
| 3:26 | You need to make your case that the problem is significant and in need of a solution                               |
|      | and that your policy or policies can help solve the problem if enacted.  |
| 3:36 | You must present research data, preferably quantitative data presented as figures and                              |
|      | tables.  |
| 3:42 | Use narrative explanation to briefly explain the quantitative data.  |
| 3:47 | Implications, which answers the question: What are the potential consequences of                                   |
|      | action or inaction?  |
| 3:54 | Discuss the implications of taking no action on the problem.   |
| 3:57 | Discuss the implications of taking action.   |
| 4:00 | What are the pros and cons of inaction and action?   |
| 4:04 | Remind your readers how your policy or polices address the problem.  |
| 4:10 | While the specific tone and style you choose to use in your writing will somewhat                                  |
|      | depend upon who your audience is, in general you should aim for an even-keeled,                                    |
|      | objective tone – even though you are writing a persuasive document.  |
| 4:24 | You need to convince your audience of the significance of the problem and the efficacy                             |
|      | of the policy or policies you describe for solving that problem, but you should not rely                           |
|      | upon an impassioned emotional tone to accomplish these goals.  |
| 4:38 | Instead rely upon the force of your evidence and logical reasoning to lead your readers                            |
|      | to the conclusion that they should act on the policies you describe to solve an                                    |
|      | important problem.   |
| 4:50 | The document may be more formal if it is being presented to policymakers or high-                                  |
|      | ranking decision makers within a healthcare facility, but the format is often flexible.                            |
| 5:02 | On this page, you see links to various policy statements, such as the American Public                              |
|      | Health Association's policy statements discussed previously in the tutorial.                                       |

5:11 As you will notice, formats vary, and as noted, length can range from just a single page to a significant work of dozens or even hundreds of pages.
