

Synthesizing What You Read

Synthesis:

The combination of two or more things to produce something new

Synthesis for Reading:

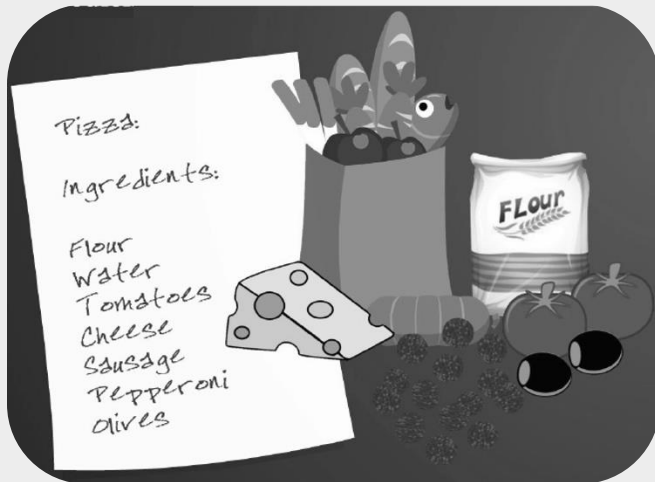

Taking ideas from what you read and combining them to form new ideas

Analyzing vs. Synthesizing

Analyzing

Involves breaking down ideas into their parts.

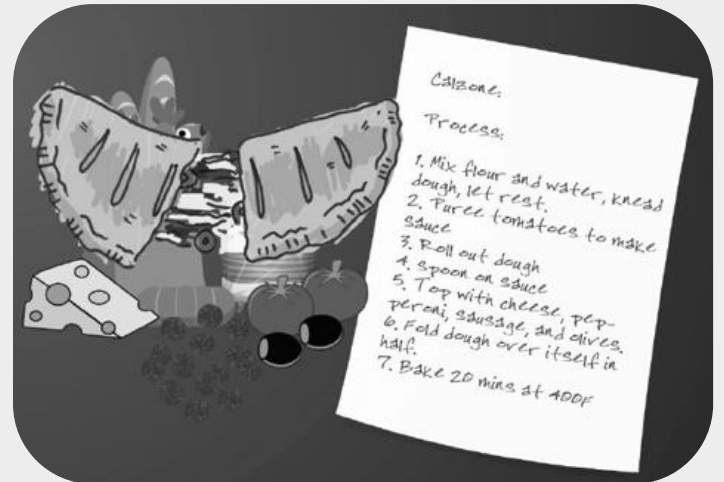

For example, you can break down a pizza into its ingredients.

Synthesizing

Involves combining ideas to form new ones.

Or, you can take those same ingredients and create something new, like a calzone.

Summarizing:

State someone else's ideas into as few words as possible

Synthesizing:

Compare or combine the ideas you've read to form new ones
